Programme Director, in order to stimulate growth and reduce poverty, it is essential to improve the supply, quality and affordability of infrastructure services. Poor infrastructure impedes economic growth.

We are therefore pleased that the national and provincial government is today delivering on the resolve of the ANC-led government to prioritise infrastructure development as one of the key job drivers. So, today we can boldly say that our ANC government is the government that delivers.

Today, we are not listening to promises but we are witnessing the actual delivery of services, and that is well-designed public transport centre for the people of Setsoto, Thabo Mofutsanyana, Free State, including our neighbouring country, Lesotho, as this centre will be accessed by travellers and transporters across the province, the country and the region.

In conclusion Programme Director, let me quote the words of Abraham Lincoln when he said, "I like to see a man proud of the place in which he lives. I like to see a man live so that his place will be proud of him."
